Welcome to your class, distraction-free.

Prevent Distracting Device-Use

Student phones enter a 'locked' "Class Mode" (which can be exited in case of emergency). Computers are flagged if on any disallowed task, which can be fully customized by Teachers.

See Real-Time Analytics and Alerts

Teachers are instantly notified if students are off-task, and can review data later for every class as desired - perfect for tracking engagement or ensuring academic integrity.

Simple, Easy, and Student-Friendly

School setup takes under an hour, and each student can be onboarded within their first class period. Wise supports schools with unlimited training for faculty, and 24/7 phone and email support - for all users including students.
